2 notices from the agencies today, in plain words, each with the original linked.

Ascorbic acid (preservative free) product class II recall begins

FDA · Recall

If you were given or used preservative-free ascorbic acid 500 mg/mL (50 mL) made by Victory Medical Center Pharmacy in Austin, Texas, this may affect you. The FDA lists it as a Class II recall.

The issue noted is lack of processing controls, which means there were problems with how the product was made. The FDA says it was distributed in Colorado, Florida, and Texas.

No specific next step is provided in this notice text. If you have this product, keep it available and watch for further instructions from the source or authorities.

Failed stability results lead to class II recall of aloe creme

FDA · Recall

If you used Tychasis Coats Aloe Creme (Allantoin 0.5%) in Texas, this may affect you. The product is sold in 4oz and 16oz jars.

The notice says stability testing results were out of specification. Specifically, viscosity and appearance did not match the established requirements.

The FDA classifies it as Class II, meaning a potential health risk.

Check whether your jar matches the product and package sizes listed in the notice, and stop using it if you're unsure.
